

MATH PROBLEM OF THE WEEK

Spring 2023 Winners
First place winners

Conrad Wesley

I'm a sophomore majoring in physics with a supplemental major in linguistics, and quite a few science and math related hobbies. I've been interested in science and math for as long as I can remember, so the Math PotW was a really fun challenge that I look forward to participating in again.

Joshua Pomeroy

I'm studying Math and Spanish and plan to graduate next May. I love people and sports, especially basketball, and I hope you have a great day.

The competition for Fall 2023 begins on October 2, 2023
